

MANIKANDAN C

System Administrator | Linux & Cloud Infrastructure

Chennai, India • +91 84898 92764 • manikandandurugam@gmail.com • github.com/Manikandan-29

PROFESSIONAL SUMMARY

System Administrator with 2+ years of hands-on experience in Linux production environments, VMware infrastructure, and cloud platforms. Actively supports CI/CD pipelines, cloud deployments, and IaC practices using Jenkins, GitLab CI/CD, Docker, Kubernetes, Terraform, and Ansible. Strong foundation in Bash scripting, monitoring, and infrastructure reliability — seeking a Junior DevOps Engineer role to bring hands-on Linux, cloud, and automation expertise to a collaborative engineering team.

SKILLS

Linux: RHEL, Ubuntu, CentOS, SUSE — 2+ yrs production management

CI/CD: Jenkins pipelines, GitLab CI/CD — setup, maintenance & releases

Containers & Orchestration: Docker, Kubernetes (kubeadm) — QA cluster management

IaC: Terraform, Ansible — hands-on in collaborative DevOps setup

Cloud: AWS (EC2, EBS, S3), Azure — hands-on production support; GCP (GCS, Compute Engine fundamentals)

Monitoring: Centreon, Zabbix — dashboards, alerts, notifications

Scripting & Config: Bash/Shell (production-used), YAML (K8s manifests, Ansible playbooks, GitLab CI); basic Python awareness

Networking: SSH, SCP, DNS, HTTP/HTTPS, ports, IP, LVM, network troubleshooting

Version Control: Git/GitHub (branching, pull requests), Tortoise SVN

Virtualisation: VMware ESXi, Hyper-V, Windows Server

EXPERIENCE

System Administrator (DevOps Support) — Corent Technology

May 2024 – Present

Chennai, India • Cloud & DevOps solutions provider

- Managed Linux production servers across Ubuntu, CentOS, RHEL, and SUSE, forming the primary OS environments for Dev, QA, and Production.
- Supported AWS cloud infrastructure (EC2, EBS, S3) and administered VMware ESXi VMs, covering provisioning, monitoring, and troubleshooting.
- Led GitLab migration from legacy CentOS to Ubuntu, upgrading to the latest stable version while maintaining 99.9% uptime and zero data loss.
- Supported Jenkins-based CI/CD pipelines and collaborated with the DevOps team on build, release, and deployment activities end-to-end.
- Configured and maintained a multi-node Kubernetes cluster using kubeadm for QA environments, alongside Docker containerised workloads.
- Assisted with Terraform and Ansible-based IaC for environment provisioning and configuration management.
- Automated routine administrative tasks with Bash scripting, cutting manual server maintenance time by 20%.
- Implemented and maintained Centreon and Zabbix monitoring, including dashboards, alert thresholds, and notification workflows.
- Managed SSL certificates, backup/restore, patching, and disaster recovery across production and QA environments.

Cloud Computing Intern — C-DAC (Centre for Development of Advanced Computing), Govt. of India

Aug 2022 – Sep 2022

- Gained hands-on exposure to cloud computing concepts and infrastructure management under a government-backed research organisation.

KEY PROJECTS

- Centreon Monitoring Implementation — Built and upgraded the Centreon monitoring platform from scratch for production infrastructure; configured dashboards, alert thresholds, and notification workflows for critical services.
- GitLab Server Migration (CentOS → Ubuntu) — Led full migration of the production GitLab instance to Ubuntu with zero data loss and 99.9% uptime maintained throughout; coordinated with development teams for build/release continuity.
- Kubernetes QA Cluster Setup — Configured a multi-node Kubernetes cluster using kubeadm, enabling containerised workload testing for QA teams.

CERTIFICATIONS

- GeeksforGeeks Cloud Bootcamp — Completed (Aug–Oct 2023, sponsored by Google for Developers)
- AWS Cloud Quest: Cloud Practitioner
- AWS Knowledge: Architecting
- AWS DevOps Certified Engineer — Besant Technologies

EDUCATION & LANGUAGES

B.E. Computer Science & Engineering — 2019 – 2023 • CGPA: 8.05

Government College of Engineering, Bodinayakanur .
